

David King Gu Ma

Nationality: Australian
Phone: +61 401 886 782
Email: hello@david-ma.net

PROFILE

Studied Bioinformatics at the University of New South Wales.
Specialising in Data Visualisation, User Experience and Community.

EXPERIENCE

- **Frontend Software Engineer** (2020 - Current) — Bioinformatics Methods Team under Simon Sadedin. A new team at the MCRI which aims to provide advanced, user friendly bioinformatics tools to remove the bottleneck found in the traditional "service bioinformatics" model and give all researchers at the MCRI access to cutting edge genetics technology in a scaleable, sustainable and maintainable way.
- **Bioinformatics Software Engineer** (2015 - 2020) — Worked on the Doig group's PathOS project at the Peter MacCallum Cancer Centre, an application for curating genetic variants found during high throughput sequencing of cancer patient samples. I oversaw the frontend development, user experience and developer operations.
- **Lead Organiser** (2016) — Ran HealthHack Australia for Open Knowledge Australia. I was responsible for the Melbourne location, national website and national technical operations. HealthHack Australia is a 48 hour hackathon which brings together more than 300 participants in 5 cities, with representatives from dozens of hospitals, research institutes, government departments and tech companies, to tackle real problems presented by healthcare professionals for hackers to solve.
- **Bioinformatics Software Developer** (2013 - 2015) — With the O'Donoghue Lab at the Garvan Institute on the Minardo project (<http://minardo.david-ma.net/>), a continuation of my undergraduate thesis (see below). I worked with a graphic designer and biologist to produce a Cell Snapshot (see publications), a webpage diagram of the Insulin Signaling Pathway using D3.js to tie data to an SVG prepared in Adobe Illustrator by the graphic designer.
- **Bioinformatics Undergraduate Thesis** (2013) — At UNSW, designing and implementing a bespoke user interface for the purpose of displaying time series mass spectrometry data projected onto the insulin signaling pathway, targeting the specific needs of researchers in the Garvan Institute of Medical Research, with the long term goal of generalisability to other datasets and research needs. (<https://minardo.org/>)
- **Science Internship** (2013) — With the O'Donoghue Lab at the CSIRO on the Aquaria project (<https://aquaria.ws/>) under Dr. Sean O'Donoghue. Worked in web development, design and data visualisation.
- **Freelance Web Developer** — Builds and maintains websites (e.g. <https://cas13.david-ma.net/>, <https://www.lindacumines.com.au/>) and is available for rapid prototyping of larger apps. Worked with the innovation agency Naked Ambition to run a Design Thinking workshop for Cbus Super. Managers from Cbus were taught Design Thinking and developed a new product from Conception to Prototyping to Testing and finally presenting to the board of directors. I provided the technical skills to quickly turn their ideas into a tangible phone app that could be tested by real users.
- **Online Crowd Management** (2012 - Current) — Managed a large online community of over 250,000 subscribers for 36 months, including designing the web layout of the forum and increasing intra-community-participation.
- **Online Event Management** (2013 - Current) — Organised 4 international photography competitions, balancing sponsorship, prizes, promotion and the legal rights of the photographers and their photos. (<http://redditphotography.david-ma.net/>)

COMPUTER LANGUAGES & TECHNICAL SKILLS

HTML, Javascript, CSS, Typescript, SCSS, Node.js, Bash, MySQL, D3.js, JQuery, Agile Development, Design Thinking, Rapid Prototyping, User Experience, JIRA, Confluence, Groovy, Grails, DataTables

PUBLICATIONS

[PathOS: a decision support system for reporting high throughput sequencing of cancers in clinical diagnostic laboratories](#) — Publication detailing the Peter MacCallum Cancer Centre's NGS clinical reporting system.

Doig KD, Fellowes A, Bell AH, Seleznev A, Ma D, Ellul J, Li J, Doyle MA, Thompson ER, Kumar A, Lara L, Vedururu R, Reid G, Conway T, Papenfuss AT, Fox SB. PathOS: a decision support system for reporting high throughput sequencing of cancers in clinical diagnostic laboratories. *Genome Med.* 2017 Apr 24;9(1):38.

[SnapShot: Insulin/IGF1 Signaling](#) — An interactive visualisation of the insulin signaling pathway.

Ma, David KG, Christian Stolte, James R. Krycer, David E. James, and Seán I. O'Donoghue. "SnapShot: Insulin/IGF1 Signaling." *Cell* 161, no. 4 (2015): 948-948.

[Visual Analytics of Signalling Pathways Using Time Profiles](#) — A textbook chapter on the application of visual design techniques to better present data, specifically time series proteomics data. DKG Ma, C Stolte, S Kaur, M Bain, and SI O'Donoghue. In Sun C, T Bednarz, TD Pham, P Vallotton, D Wang, eds. *Signal and Image Analysis for Biomedical and Life Sciences*. Switzerland: Springer, 2014;3-22.

[Visual analytics of the insulin signalling pathway using phosphorylation time profiles](#) —

Conference proceedings, detailing a new solution to visualising high dimension network graphs.

DKG Ma, C Stolte, S Kaur, M Bain, and SI O'Donoghue. In *Proceedings of the 2013 International Symposium on Computational Models for Life Sciences (CMLS-13)*, Sydney, Australia. AIP Conference Proceedings 1559, 185-96.

AWARDS

The Minardo project was part of Biocode, a finalist entry for the **[2015 Eureka Prize for Excellence in Interdisciplinary Scientific Research](#)**.

[Minardo: Untangling the Hairball](#) won the Nature Methods poster prize at VIZBI 2016.

EDUCATION

Trinity Grammar School — International Baccalaureate

University of New South Wales, Sydney, NSW — Bachelor of Engineering (Bioinformatics)
